

Felecia Meyers

For
Sardinia Councilwoman

My name is Felecia Meyers. I am running for Town Council this November. I hope you seriously consider voting in this election as there are many seats open this year and the future of Sardinia has been put in your hands.

My history....

I was raised in the town of Chaffee by parents exemplifying community service. My father, Roger Dole, is an army veteran and a long time member of the Chaffee-Sardinia Fire Company and my mother, Margery Dole was a long time member of the Sardinia Town Planning Board. Each has been an active member of St. Jude's Catholic Church for as long as our family has lived here. My parents leave very large shoes to fill with such examples of community efforts. I aspire to be as involved as they have been and still are. I believe in this community. I returned to Sardinia to raise my children in the community where I was raised. After 14 years of military service, living in large cities and traveling half way around the world, my service time has taught me teamwork, how to make tough decisions, leadership and a work ethic that doesn't end like a 9-5 job.

My vision...

Sardinia has a vast amount of natural resources. I wish to keep it that way. Those of us that have had the privilege of using our town parks either as children or as adults understand the asset we have. I want that asset to be a gem in our community. The Town Comprehensive Plan clearly shows the direction we need to focus. I'd like to seek a grant writer to tap the governmental resources available for assisting with financing and establishing time lines for accomplishing the tasks at hand.

- I'd like to see a 10 year fiscal plan in place so all citizens understand where and how items are to be financed along with the future financing of capital projects within the town.
- I also see a need for senior housing. This community needs its seniors, their experience and their connection to the history of this fine town. Unfortunately, at this time, Sardinia does not offer an affordable assisted living or senior living facility to keep our loved ones close.
- I believe in technology and its use for dissemination of public information. I'd like to see more automation in the town clerks' office and a newsletter to keep citizens informed of issues and progress in the town.
- I am all for long term planning, sound fiscal management and decisions based on facts. I do not believe in recreating the wheel. We have many studies and surveys to draw information from and enable a sound decision making process.

I have read the surveys you completed and the one issue that came through loud and clear is that the nasty politics must end. You can help me with this. My running mates and I offer a wealth of experience and community service and will most definitely serve you best. We are caring neighbors and friends. We can make progress through friendship. **Vote for good government on November 3rd.**
