

Tony Korcz

For
Sardinia Councilman

My vision for the next board is to work as a team, not as individuals or party vs. party. Also to invite input from the town residents and have them involved in the problem solving and decision making as part of the team.

When it comes to the water issues both current and future, this will have long term effects on the growth of Sardinia. The existing system is going to be nearly redone from pumps to houses. Looking to the future expansion either thru the current Chaffee Water Works or via other systems, this will play a large part in the expansion of the Route 16 and 39, Schutt Road area for business growth. Water supply and quality of water is a basic need throughout our town. Further water testing may be necessary.

The house number signs are another area of interest to me. We should support and continue the current process that has been started. Personal safety and property protection is of the highest priority. If the fire company can't find your house, they cannot help you.

Finally we must continue to support all groups in our town as they work to make a stronger community. I need your vote and Sardinia needs your vote.
November 3rd.
